Sequence_when_User_clicks_"save"_button

```
     Browser                                                    Server

        |  HTTP POST Request https://studies.cs.helsinki.fi/exampleapp/new_note  |
        | ---------------------------------------------------------------------> |
        |                                                                        |
        |          Server appends the data entered by user to the notes page     |
        |          and responds with status code 302                            |
        |                                                                        |
        |                       Status Code 302                                  |
        | <--------------------------------------------------------------------- |
        |                                                                        |
  Browser reloads the 'notes' page                                              |
        |                                                                        |
        |  HTTP GET Request https://studies.cs.helsinki.fi/exampleapp/notes     |
        | ---------------------------------------------------------------------> |
        |                                                                        |
  The rest of the process is just same as mentioned in "Loading a page          |
  containing JavaScript - review"                                              |

     Browser                                                    Server
```
